

## Mench Financial, Inc. Markets Outlook 1Q 2019

The composite U.S. Treasury curve yield is currently 2.70%. Over the next twelve months, we believe that fixed income annual total returns will continue to be nominal to negative. We will continue to favor short and intermediate term investment grade bonds over long-term bonds.

For the next twelve months, we are projecting that global equities will produce normalized positive annual total returns. Based on this forecast, we are emphasizing domestic and international equities over fixed income securities.

If you have questions about our outlook and portfolio allocations, you can call us at 800-372-9117 or go to [www.menchfin.com](http://www.menchfin.com) for a more detailed presentation of market and economic conditions.
